

# Innovation Framework – Local Corporation

## Key Performance Indicators (KPIs)

Completing the empty number fields on this chart and continually measuring them on a regular basis will help to identify a high performing innovation processes. It can also identify common issues such as a dry “idea pipeline” as well as process breakdowns like “analysis paralysis” type of issues where you recognize that 50% of your projects are stuck in post MVP analysis phase and not enough attention is being paid to new discoveries.

This model is built on the foundation of the lean startup methodologies and provide a complimentary framework to those who have adapted that style.
