SMARTORG[®]

Get out of your innovation comfort zone

David Matheson

InnoLead Master Class 21 September 2022

The ATM of Photoprinting (circa 2000)

- Business: 46B 4x6 prints annually
- Technology: Delivers Instant print satisfaction
- Customer: People thrilled with idea!

Work vs. proof: HP's idea for the "ATM of photo printing."

• What is the biggest source of risk?

• Supply Chain

- Very difficult to set up, very complex
- Large source of schedule and budget variance.

Work vs. proof: HP's idea for the "ATM of photo printing."

• What is the biggest source of risk?

• Supply Chain = needs work

- Very difficult to set up, very complex
- Large source of schedule and budget variance.
 HP is world class at this!

• Behavior change = needs proof

- Will someone encountering a station on the street pull out their camera card and print?
- To get evidence, saturate an area with prototypes.

Fast 4x6 Print Engine

Addressing the needs of incumbents

"Dry" Photofinishing lab Semi-Attended Environs Low Volume Stores

"Can I get the printer part of the kiosk"

"Just chop the head off, add an Ethernet, and I'll write you a check!"

What is between you and success?

Think of an innovation project you are involved with.

Drop into the chat an issue that is on the "straight" path to its success.

What is between you and success?

Think of an innovation project you are involved with.

Drop into the chat an issue that is on the "straight" path to its success.

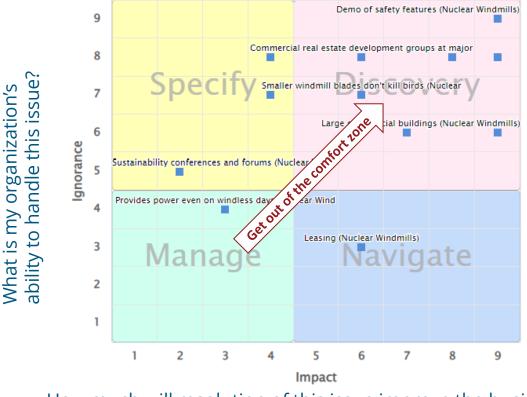

Now drop into the chat an issue that might send you off in a weird direction.

what it really looks like

The best learning comes from the Discovery Zone

How much will resolution of this issue improve the business case or probability of success? (Top of the tornado)

Get the wiggles out in Incubation with Learning Plans.

LEARNING PLANS

EXECUTION PLANS

SMARTORG[®]

What do you need to learn before committing?

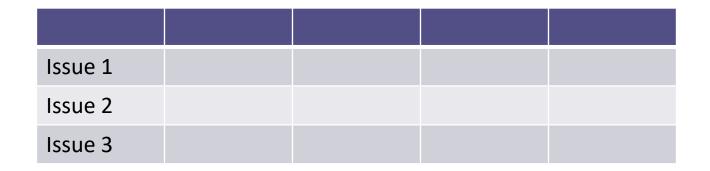

| | Execution Plan | Learning Plan |
|-------------|------------------------------|-----------------------------|
| Objective | Get it done | Figure it out |
| Deliver | Progress | Evidence |
| Focus | Tasks | Discovery Issues |
| Milestones | Progress Checkpoints | Pivot Decisions |
| Strategy | Align & Build Momentum | Pursue decisive experiments |
| Uncertainty | Eliminate / mitigate / avoid | Seek, explore |
| Measure | Budget and Schedule | Improve readiness |

Understand the new terrain

Write a few issues about your project on a piece of paper.

(Go ahead and steal from the earlier chat log)

Drop one or two into the chat log to get a sense of the group.

Structured brainstorming can help.

Help make sure you have everything covered Involve stakeholders and skeptics so they know you are listening. Here are two well known canvases that work well:

Ignorance: ability of core organization to deal with this issue on a 1-9 scale

SPECULATIVE 9 – **8** – 7

High levels of surprise likely

Little basis for the assumption, unground or unfamiliar area for the organization, well outside our competence zone. UNCOMFORTABLE 6 - **5** - 4

Range bounded but challenges core organization

A range of uncertainty perceived as too large for the organization or on a topic outside the expertise of organization. ROUTINE 3 – **2** – 1

We will get there

Within narrow estimation error or a kind of uncertainty in the organization's wheelhouse.

Rate your issues on Ignorance

SPECULATIVE 9 – **8** – 7

High levels of surprise likely

UNCOMFORTABLE 6 – **5** – 4

Range bounded but challenges core organization ROUTINE 3 – **2** – 1

We will get there

| | Ignorance | | |
|---------|-----------|--|--|
| lssue 1 | 9 | | |
| Issue 2 | 6 | | |
| Issue 3 | 3 | | |

Defining the Impact of an Issue

How much will the resolution of this issue change your confidence in the business case or its upside?

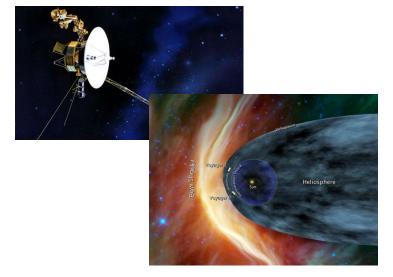

How do these Issues Impact the business case?

Can we make a go of it?

How far can we go?

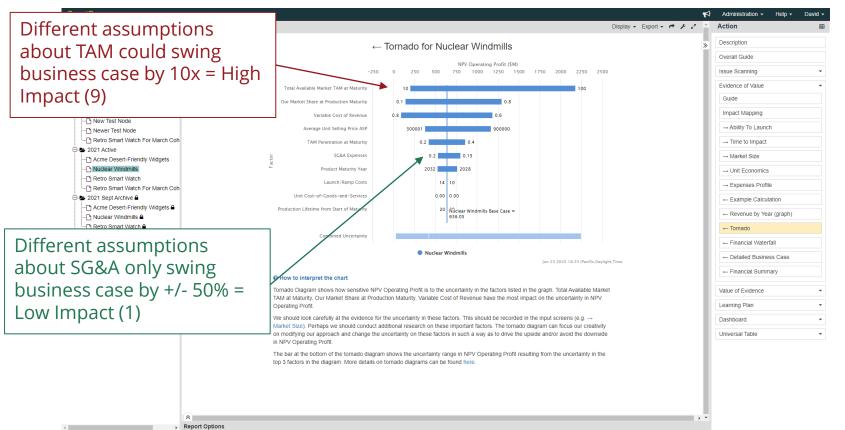

Potential showstoppers in the near term that could stop us from even launching **probability of success**

Drive longer term assumptions in business case around market, economics, timing, etc. **upside**

What drives the upside of your opportunity?

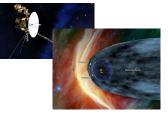

SMARTORG[®]

Wing-it method: assess impact for each issue using guidelines

Showstopper issues

Upside Issues

Focus on chance of failure: Hard = 75%+ chance of failure = 8 Medium = 25%-75% chance of failure = 5 Easy = 25%- chance of failure = 2

Focus on how much different assumptions swing business case: High = Swing business case by 10x = 9 Low = Swing business case by +/- 50% = 1

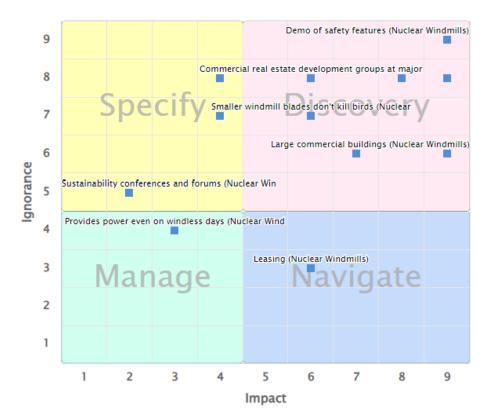

| | Ignorance | Impact | |
|---------|-----------|--------|--|
| lssue 1 | 9 | 9 | |
| Issue 2 | 6 | 7 | |
| Issue 3 | 3 | 4 | |

SMARTORG®

Demonstrate it

Get out of the Comfort Zone and into the Discovery Zone

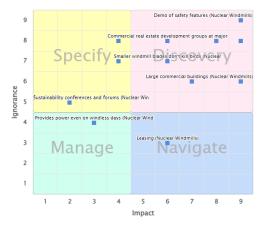

Create a learning plan based on experiments that help you learn / influence Discovery zone issues.

What zone are your issues in?

Specify: High Ignorance (5+) Low Impact (4-)

Manage: Low Ignorance (4-) Low Impact (4-)

Discovery: High Ignorance (5+) High Impact (5+)

Navigate: Low Ignorance (4-) High Impact (5+)

| | Ignorance | Impact | Zone | |
|---------|-----------|--------|-----------|--|
| Issue 1 | 9 | 9 | Discovery | |
| Issue 2 | 6 | 7 | Discovery | |
| Issue 3 | 3 | 4 | Manage | |
